

EOMONTH

Updated: 31 Mar 2016

Use [EOMONTH](#) to return the date for the last day of the month that is the indicated number of months before or after the start date. Use [EOMONTH](#) to calculate maturity dates or due dates that fall on the last day of the month.

Syntax

```
Public Shared Function EOMONTH(  
    ByVal Start_date As Date,  
    ByVal Months As Integer,)
```

Arguments

Start_date

the date the number of months is going to be added to or subtracted from. *Start_date* is an expression that returns a **Date**, or of a type that can be implicitly converted to **Date**.

Months

an integer added to the *Start_date* representing the number of months before or after the *Start_date*. *Months* is an expression that returns an **Integer**, or of a type that can be implicitly converted to **Integer**.

Return Type

Date
